GOLDEN DRAGON CAPITAL

CHINA SILICON-BASED ANODE MATERIAL

Industry Research Report

Author: Brendan Jephcott

Date: June 2026

Table of Contents

Executive Summary 2
1.0 Introduction 6
1.1 Rise of Silicon-Based Composite Anode Material 6
1.2 Electrode Manufacturing 9
2.0 Silicon-Based Anode Material 12
2.1 Characteristics of Silicon as an Anode Material 12
2.2 Characteristics of SiOx as an Anode Material 14
2.3 Silicon-Based Anode Material Challenges 14
2.4 Silicon-Based Anode Material Products 16
3.0 Silicon-Based Anode Material Structure Design 19
3.1 Nanosized Si Structure 19
3.2 Porous Structure 22
3.3 Core-shell Structure 23
3.4 Yolk-shell Structure 24
3.5 Embedded Structure 26
4.0 Silicon-Based Anode Material Production Methods 26
4.1 Si/C Anode Material Grinding Production Method 28
4.2 SiOx Anode Material Grinding Production Method 30
4.3 SiOx Anode Material Pre-magnesium & Pre-lithium Production Method 31
4.4 Silicon-Carbon Anode Material CVD Production Method 34
4.4.1 CVD Si/C Anode Material Cash Cost Analysis 40
4.5 Silicon Anode Upstream Raw Materials 41
4.5.1 Silicon 42
4.5.2 Silane Gas 44
4.5.3 Porous Carbon 47
4.5.4 Novel Binders 50
5.0 Chinese Silicon-Based Anode Material Standards 53
5.1 GB/T 38823-2020 Silicon-carbon 53
5.2 YB/T 6260-2024 Silicon monoxide carbon composite 54
6.0 Pricing 56
7.0 Commercialisation 57
7.1 Consumer Electronics 57
7.2 New Energy Vehicles 59
7.3 4680 LIB Cell to Promote Silicon-Based Anode Materials 60
7.4 Fast-Charging to Promote Silicon-Based Anode Material 63
7.5 Solid State Battery Products 66
8.0 Market Size Potential 68
9.0 Silicon-Based Anode Material Enterprises 70

9.1 Chinese Companies 70
9.2 Overseas Companies 78
References 79
Disclaimer 82
