GOLDEN DRAGON CAPITAL

SOLID-STATE LITHIUM-ION BATTERY

Market Research Report

Author: Brendan Jephcott

Date: July 2025

Table of Contents

Executive Summary 2
1.0 Introduction 16
1.1 Development History 16
1.2 Working Principal 18
1.3 Component Materials 21
1.4 Product Performance 21
1.4.1 High Energy Density 21
1.4.2 Longer Lifetime 22
1.4.3 High Safety 22
1.5 Performance Comparison to Traditional Liquid Lithium-ion Batteries 24
1.6 Government Development Goals 27
1.6.1 China 27
1.6.2 Japan 28
1.6.3 South Korea 29
1.6.4 United States 29
1.6.5 Germany 30
1.7 Research and Development 30
1.7.1 China 33
1.7.2 Japan 34
1.7.3 South Korea 35
1.7.4 United States 35
1.7.5 France 35
1.7.6 Germany 35
2.0 Solid-State Battery Component Materials 35
2.1 Solid Electrolyte Material 36
2.1.1 Polymer Electrolyte 42
2.1.2 Oxide Electrolyte 46
2.1.3 Sulfide Electrolyte 53
2.1.4 Halide Electrolyte 56
2.2 Cathode Material 58
2.3 Anode Material 59
2.4 Separator Material 60
3.0 Solid-State Battery Principal Production Methods 61
3.1 Solid Electrolyte Separator Production Methods 62
3.1.1 Wet Processing 62
3.1.2 Dry Extrusion (Solvent-free) Processing 62
3.1.3 Powder-based Processing 63
3.2 Cathode Production Methods 63

3.2.1 Wet Processing 63
3.2.2 Dry Processing 65
3.3 Anode Production Methods 66
3.3.1 Li Metal Anodes 66
3.3.2 Graphite/Silicon Anodes 67
3.4 Solid-State Battery Manufacturing Process 67
3.4.1 Electrode and Electrolyte Separator Production 68
3.4.2 Cell Assembly 69
3.4.3 Cell Finishing 70
3.5 Compatibility Between Component Materials 71
4.0 Industry Development Trends 73
4.1 Short Term Development 73
4.2 Short Term Development Opportunities 74
4.3 Development trends Out To 3030 79
5.0 Cash Cost Forecast 81
6.0 Global Development and Commercialisation 83
6.1 China 85
6.2 Taiwan 104
6.3 Japan 108
6.4 South Korea 112
6.5 United States 114
6.6 France 125
7.0 Market Size and Potential 126
References 127
Disclaimer 134
