

Lithium-ion Battery Precision Structural Parts Industry Market Research Report

Date: August, 2023

Author: Brendan Jephcott

GOLDEN DRAGON CAPITAL

Table of Contents

Executive Summary	2
1.0 Introduction	10
1.1 Precision Structural Parts Characteristics.....	12
2.0 Principal Production Method	16
3.0 Commercialisation	19
3.1 Cylindrical, Prismatic and Pouch Structural Parts.....	19
3.2 New 4680-Type Large Cylindrical Battery	20
3.1 Competitive Landscape	23
3.2 Market Size Potential.....	28
Appendix: Case Study — Shenzhen Kedali Industry Co., Ltd.....	31
1.0 Introduction	32
2.0 Lithium-ion Battery Precision Structural Parts Business	33
2.1 Main Products.....	33
2.2 Production Bases	34
2.3 Customer Relationships.....	39
2.3 Research and Development	44
2.4 Technology Advantages	48
2.5 Imported Equipment	53
3.0 Financial Situation.....	58
References.....	64
Disclaimer	65

Table of Figures

Figure 1: Lucid Air electric vehicles use high-performance lithium-ion batteries	10
Figure 2: Lithium-ion battery component materials (cathode, anode, separator, electrolyte, and structural parts)	10
Figure 3: Lithium-ion battery packaged shapes — (a) cylindrical, (b) prismatic, and (c) pouch	11
Figure 4: Lithium-ion battery outer shell casing types and component materials	11
Figure 5: Cash cost distribution of lithium-ion battery component materials	12
Figure 6: Lithium-ion battery structural parts (prismatic aluminium shell, round cover, soft link).....	13
Figure 7: Lithium-ion battery shell casings are classified by material.....	14
Figure 8: Consumer cylindrical lithium-ion battery structural parts (illustrative).....	15
Figure 9: EV-Type lithium-ion battery structural parts (illustrative).....	15
Figure 10: Prismatic shaped lithium-ion battery structural parts (illustrative)	15
Figure 11: Schematic diagram and physical picture of the safety valve of a lithium-ion battery case (illustrative)	16
Figure 12: Principal production process flowsheet of EV-Type lithium-ion battery top cover and casing	17
Figure 13: Principal production process flowsheet and mode of EV-Type lithium-ion battery case.....	17
Figure 14: Casing, cover plate, and soft connection process flowsheet used by Shenzhen Kedali Industry Co., Ltd ..	18
Figure 15: Mold development processing flowsheet used by Shenzhen Kedali Industry Co., Ltd.....	18
Figure 16: Example of a large cylindrical battery.....	20
Figure 17: All tab structure vs traditional cylindrical battery current collector	20
Figure 18: Tesla 4680 battery cell.....	21
Figure 19: Tesla 4680 battery cell.....	21
Figure 20: Lithium-ion Battery Structural Parts Company Sales Revenue (2021).....	23
Figure 21: Market concentration of lithium-ion battery structural parts industry (2021).....	23
Figure 23: Sales proportion to total annual sales of the top five customers of structural component companies.....	24
Figure 23: EVE Energy audit and certification process flowsheet for its upstream suppliers	25
Figure 24: Proportion of fixed assets in the lithium-ion battery industrial chain.....	27
Figure 25: Comparison of investment intensity needed for lithium-ion battery component material projects	28
Figure 26: Lithium-ion battery structural parts market size forecast (2021 to 2026E)	29
Figure 27: CATL outer casing / top cover procurement volume (2015 to 2021)	30
Figure 28: CATL lithium-ion battery production and structural parts unit price value (2015 to 2021)	30
Figure 29: Kedali — Capital structure	32
Figure 30: Kedali — Share price history.....	32
Figure 31: Kedali — Core technology moats.....	33
Figure 32: Kedali — Lithium-ion battery structural parts product offerings.....	33
Figure 33: Market concentration of lithium-ion battery structural parts industry (2022).....	34
Figure 34: Kedali — Huizhou Kedali Precision Industry Co., Ltd	35
Figure 35: Kedali — Jiangsu Kedali Precision Industry Co., Ltd	35
Figure 36: Planned production capacity of Huizhou and Jiangsu production bases	36
Figure 37: Kedali — Planned production capacity of overseas production bases.....	36
Figure 38: Kedali — Cooperation sales model.....	39
Figure 39: Kedali — Main customers	39
Figure 40: Top ten global power battery installed capacity (2022).....	40
Figure 41: Estimate Revenue from the CATL contract (2023E to 2025E).....	42
Figure 42: Tesla 4680 battery CTC structure diagram	43
Figure 43: Kedali — Interactive R&D process.....	44
Figure 44: Kedali — R&D expenditure (unit: million CNY, %)	46
Figure 45: Kedali — R&D personnel	46
Figure 46: Pre-nickel-plated steel shell process flowsheet used by Kedali	48
Figure 47: Schematic diagram of the structure of a nickel-plated steel case for lithium-ion batteries	48
Figure 48: Previous flip valve technology (21' is the flip piece, 31' is the pole cover, 2' is the flip valve)	49
Figure 49: Kedali flip valve technology (33 is thermal insulation material, 32 is the accommodation area, 31 is the covering part of the pole, 21 is the turning piece, 2 is the turning valve).....	49

List of Tables

Table 1: Comparison of precision structural parts of a conventional lithium-ion battery.....	12
Table 2: Conventional lithium-ion battery precision structural parts (shell top cover and shell bottom).....	13
Table 3: Comparison of cylindrical, prismatic, and pouch batteries.....	19
Table 4: Planned layout of large cylindrical batteries by mainstream gigafactories.....	22
Table 5: Comparison similar projects within the lithium-ion battery precision structural parts industry	26
Table 6: Investment amount and payback periods of comparable projects.....	26
Table 7: Calculation of investment intensity in lithium-ion battery component material projects	27
Table 8: Investment funds needed for lithium-ion battery structural parts projects.....	28
Table 9: Calculation of demand for global lithium-ion battery structural parts industry (2021 to 2026E)	29
Table 10: CATL procurement of lithium-ion battery structural parts and unit price value	30
Table 11: Kedali — 13 domestic and 3 overseas production bases.....	37
Table 12: Kedali — Planned production capacity (2021 to 2024E)	38
Table 13: Kedali — Customer planned production capacity expansions (unit: 100 million CNY, GWh).....	40
Table 14: Kedali — Revenue calculation for signing a strategic cooperation agreement with CATL	42
Table 15: Kedali — Company structural parts R&D projects.....	45
Table 16: Kedali — Related patents.....	47
Table 17: Kedali — Purchases a variety of imported equipment.....	54
Table 18: Kedali — Quality management system certifications of its products	57
Table 19: Kedali — Financials forecast (2019 to 2024E)	63
