

The background of the page is a photograph of an electric vehicle (EV) charging station. A blue charging cable is plugged into a charging port. The image is overlaid with several semi-transparent, geometric shapes in shades of white, grey, and brown, creating a modern, layered effect. The text is positioned on the left side of the page, partially overlapping the white and grey geometric shapes.

EV Charging Industry Research Report

Date: January, 2024
Author: Brendan Jephcott

Prepared by:

GOLDEN DRAGON CAPITAL

Table of Contents

Executive Summary	2
1.0 Introduction: Rise of the Charging Pile Industry	8
2.0 Product Types	12
2.1 AC Charging Pile Technology	13
2.2 DC Charging Pile Technology	15
2.3 Product Certification and Industry Standardisation	16
3.0 Industry Chain and Competitive Landscape.....	18
3.1 Upstream — Charging pile equipment and components manufacturers.....	20
3.2 Midstream — Manufacturers of charging piles	26
3.3 Downstream — Professional operators	27
3.4 Cash Cost Analysis.....	35
4.0 Commercialisation	37
4.1 China	37
4.2 Europe	43
4.3 United States	49
5.0 Industry Development Trends	54
5.1 Rise of High-Voltage Charging	54
5.2 High-Voltage Control Systems	68
5.3 De-OBC Movement	70
5.4 Charging Pile High-Voltage Electrical System	71
5.5 Power Module Converter Upgrade	73
5.6 Solving partial discharge and bearing corrosion	76
5.7 Liquid Cooling System Upgrades	77
5.8 High-Voltage Fuses	80
5.9 Other component upgrades: (relays, connectors, and film capacitors).....	81
5.10 Solar-Storage-Charging Integration Power Stations.....	82
6.0 Market Size Potential	87
6.1 China	89
6.2 United States	90
6.3 Europe	91
Appendix: Case Study — Gresgying Digital Energy Technology Co., Ltd	92
References.....	102
Disclaimer	103

Table of Figures

Figure 1: Sales volume and market penetration rate of new energy vehicles in China (Jan 2020 — May 2023).....	8
Figure 2: BYD Han, a common electric vehicle sold in China	8
Figure 3: Sales volume of electric vehicles in Europe and the United States (Jan 2020 — March 2023)	9
Figure 4: Tesla Model 3, a common electric vehicle sold throughout Europe and the United States	9
Figure 5: Global new energy vehicle sales and market penetration rate (2015 — 2021).....	10
Figure 6: Important factors hindering consumers from purchasing new energy vehicles	10
Figure 7: Battery swapping technology for electric vehicles	11
Figure 8: Charging pile used for charging electric vehicle batteries	11
Figure 9: Charging pile industry classification	12
Figure 10: Diagram of comparing an AC charging pile and DC charging pile	13
Figure 11: On-Board-Charger used in an electric vehicle.....	14
Figure 12: Schematic diagram of an AC charging pile and its internal electrical structure	14
Figure 13: DC charging pile product structure.....	15
Figure 14: Internal electrical structure of a DC charging pile.....	16
Figure 15: Global charging pile interface standards	17
Figure 16: Proportion of cost structure of charging pile components (2021)	20
Figure 17: Cost composition of 120kW DC charging pile equipment	21
Figure 18: Charging modules produced by Winline Technology.....	21
Figure 19: Cost ratio of DC charging modules	22
Figure 20: Integrated circuits produced by Infineon	22
Figure 21: Cost of DC charging module	23
Figure 22: Charging operator-led model	29
Figure 23: Auto company-led model.....	29
Figure 24: China public charging pile industry (as of October 2022).....	31
Figure 25: China shared private charging piles (as of October 2022)	31
Figure 26: Market share of L2 AC charging piles in the United States	32
Figure 27: Market share of DC fast charging piles in the United States	32
Figure 28: Distribution of charging piles in Europe.....	33
Figure 29: Comparison of the gross profit margin of Chinese and overseas businesses	35
Figure 30: Revenue of major overseas charging pile companies (2022)	35
Figure 31: Development history of China’s charging pile industry (2006 — Present).....	37
Figure 32: Total planning of charging piles in each province and city by 2025.....	38
Figure 33: Charging piles installed in China (2018 – Oct, 2022)	40
Figure 34: Public AC and DC charging piles installed in China (2018 – Oct, 2022)	41
Figure 35: Number of AC charging piles and DC charging piles in China (2020 — 2022)	41
Figure 36: Number of charging piles in China and the year-on-year growth rate (January 2020 — May 2023)....	42
Figure 37: China stock and incremental car-to-pile ratio (2015 — 2022)	42
Figure 38: European public pile holdings and year-on-year growth rate (Q1-2020 — Q1-2023)	45
Figure 39: Europe stock and incremental public vehicle-to-pile ratio (2012 — 2022)	45
Figure 40: Europe is dominated by AC slow-charging piles below 22KW (2020).....	46
Figure 41: Proportion of public fast and slow charging piles in Europe (2020).....	47
Figure 42: Charging piles per 100 kilometres and share of EVs by country (2020).....	47
