

Lithium Hexafluorophosphate Market Research Report

Date: March, 2023

Author: Brendan Jephcott

Prepared by:

GOLDEN DRAGON CAPITAL

Table of Contents

1.0	Introduction	5
1.1	Principal Theory of Electrolyte	5
1.2	Product Performance Requirements.....	7
1.2.1	Solvents	8
1.2.2	Additives	10
1.2.3	Lithium salts	11
2.0	Principal Production Methods and Cash Cost Comparison.....	12
2.1	Principal Production Methods	12
2.2	Cash Cost Analysis.....	14
3.0	Market Prices	17
4.0	Commercialisation	20
4.1	Market Supply.....	20
4.1.1	Global Electrolyte Production.....	20
4.1.2	Global Lithium Hexafluorophosphate Production	24
4.2	Market Demand	27
4.3	Market Size Potential.....	30
4.4	Future Development Trends	32
4.4.1	New Lithium Salt Applications.....	32
4.4.2	New Additives Applications.....	37
	Appendix: Guangzhou Tinci Materials Technology Co., Ltd.....	43
1.1	Business Overview	43
1.2	Financial Situation	46
	References.....	50
	Disclaimer	51

Table of Figures

Figure 1: Lithium-ion battery components and theoretical working principal	5
Figure 2: Lithium-ion battery electrolyte composition.....	5
Figure 3: Principle of electrolyte affecting the performance of lithium-ion battery	6
Figure 4: Lithium-ion battery cost ratio of each component material.....	7
Figure 5: Cost ratio of each raw material of electrolyte.....	7
Figure 6: Principal flowsheets of mainstream lithium hexafluorophosphate production methods	12
Figure 7: Lithium hexafluorophosphate principal production process using the hydrogen fluoride solvent method	13
Figure 8: Lithium hexafluorophosphate (liquid) principal production process.....	14
Figure 9: Lithium hexafluorophosphate (solid) principal production process.....	14
Figure 10: Electrolyte has the lowest investment cost per unit of GWh across the industry chain.....	16
Figure 11: Investment per tonne of lithium hexafluorophosphate is the highest.....	16
Figure 12: Cost Structure of Electrolyte in LFP Batteries (blue: Li salt, yellow: solvent, red: additive).....	17
Figure 13: Cost Structure of Electrolyte in Ternary Batteries (blue: Li salt, yellow: solvent, red: additive)	18
Figure 14: Proportion of LiPF ₆ cost in electrolyte to market price	18
Figure 15: Electrolyte, LiPF ₆ and Li ₂ CO ₃ prices trend (10,000 CNY per tonne).....	20
Figure 16: Price trend of Li ₂ CO ₃ , LiPF ₆ and electrolyte.....	20
Figure 17: Global electrolyte production (2021).....	21
Figure 18: China electrolyte market share (2021)	21
Figure 19: Non-China Electrolyte Production (2021)	22
Figure 20: Global electrolyte production forecast (2019 to 2024e)	23
Figure 21: Tinci Materials — planned electrolyte expansion capacity.....	23
Figure 22: Global lithium hexafluorophosphate production (2021).....	24
Figure 23: China lithium hexafluorophosphate production (2021).....	25
Figure 24: Non-China lithium hexafluorophosphate production (2021)	25
Figure 25: Global lithium hexafluorophosphate production forecast (2020 to 2025).....	26
Figure 26: Tinci Materials — planned LiPF ₆ expansion output.....	27
Figure 27: Global new energy vehicles sales volume	28
Figure 28: Penetration rate of new energy vehicles in China and the world.....	29
Figure 29: Global EV-Type LIB shipments (GWh).....	30
Figure 30: Global EV-Type LIB shipments year-on-year growth.....	30
Figure 31: Global electrolyte shipments (10,000 tonnes).....	31
Figure 32: Global electrolyte shipments year-on-year growth.....	31
Figure 33: Global electrolyte production forecast (2016 to 2024e)	32
Figure 34: Lithium bis(fluorosulfonyl)imide principal production process	33
Figure 35: Lithium bis(fluorosulfonyl)imide principal production process using the gasification sub-plot method	34
Figure 36: Lithium bis(fluorosulfonyl)imide demand forecast (2021 to 2025e)	36
Figure 37: Vinyl sulfate (DTD) molecular formula.....	39
Figure 38: FEC molecular formula (left) and VC molecular formula (right).....	40
Figure 39: Vinylene carbonate (VC) price trend (CNY per tonne).....	40
Figure 40: LiPO ₂ F ₂ molecular formula	42
Figure 41: Tinci Materials — Guangzhou City, China.....	43
Figure 42: Tinci Materials — capital structure	43
Figure 43: Tinci Materials — stock price history (CNY)	44
Figure 44: Tinci Materials — battery materials business overview	44
Figure 45: Tinci Materials — electrolyte product portfolio.....	45
Figure 46: Tinci Materials — additives product portfolio	45
Figure 47: Tinci Materials — new business product portfolio.....	45
Figure 48: Tinci Materials — electrolyte shipments (10,000 tonnes) and market share	46
Figure 49: Tinci Materials — proportion of the company's business composition	46
Figure 50: Tinci Materials — operating income (100 million CNY) and year-on-year growth rate	47
Figure 51: Tinci Materials — net profit attributable to the parent company (unit: 100 million CNY).....	47
Figure 52: Tinci Materials — gross profit margin and net profit margin.....	48
Figure 53: Tinci Materials — corporate expense ratio	48
Figure 54: Tinci Materials — R&D expenditure per capita.....	49

List of Tables

Table 1: Electrolyte performance requirements.....	6
Table 2: Mainstream electrolyte composition	8
Table 3: Organic solvent performance requirements.....	9
Table 4: Commonly solvents used in lithium-ion battery electrolyte.....	9
Table 5: Common additives used in lithium-ion battery electrolyte	10
Table 6: Comparison of additives used in lithium-ion battery electrolyte.....	10
Table 7: Commonly used lithium salts used in lithium-ion battery electrolyte.....	11
Table 8: Lithium hexafluorophosphate product standard used in China (HG/T4066-2015)	12
Table 9: Lithium hexafluorophosphate (liquid) production process cash cost analysis.....	15
Table 10: Lithium hexafluorophosphate (solid) production process cash cost analysis.....	15
Table 11: Cash cost comparison of the lithium hexafluorophosphate solid and liquid production process	15
Table 12: Cost structure comparison of electrolyte in LFP and ternary lithium-ion batteries	17
Table 13: Summary of global electrolyte production capacity (tpa).....	22
Table 14: Guangzhou Tinci Materials Technology Co., Ltd — planned electrolyte expansion capacity.....	24
