

The background of the cover features a blurred industrial scene. In the upper right, a robotic arm with orange and yellow segments is visible. Below it, there are rows of grey, rectangular battery components or modules. The entire image is overlaid with a white diagonal line that divides the cover into two main sections. The text is positioned on the white section on the left.

Solid-State Lithium-ion Battery Market Research Report

Date: January, 2024

Author: Brendan Jephcott

GOLDEN DRAGON CAPITAL

Table of Contents

Executive Summary	2
1.0 Introduction	14
1.1 Development History	14
1.2 Working Principal.....	16
1.3 Component Materials.....	18
1.4 Product Performance.....	19
1.4.1 High Energy Density	19
1.4.2 Longer Lifetime	19
1.4.3 High Safety	20
1.5 Performance Comparison to Traditional Liquid Lithium-ion Batteries	21
1.6 Government Development Goals	24
1.6.1 China	25
1.6.2 Japan	26
1.6.3 South Korea.....	26
1.6.4 United States	27
1.6.5 Germany	27
1.7 Research and Development	28
1.7.1 China	30
1.7.2 Japan	31
1.7.3 South Korea.....	32
1.7.4 United States	32
1.7.5 France.....	32
1.7.6 Germany	32
2.0 Solid-State Battery Component Materials	32
2.1 Solid Electrolyte Material	33
2.1.1 Polymer Electrolyte	39
2.1.2 Oxide Electrolyte.....	43
2.1.3 Sulfide Electrolyte	50
2.1.4 Halide Electrolyte.....	53
2.2 Cathode Material	55
2.3 Anode Material	56
2.4 Separator Material	58
3.0 Solid-State Battery Principal Production Methods.....	58
3.1 Solid Electrolyte Separator Production Methods	59
3.1.1 Wet Processing.....	59
3.1.2 Dry Extrusion (Solvent-free) Processing.....	59
3.1.3 Powder-based Processing	60
3.2 Cathode Production Methods	60

GOLDEN DRAGON CAPITAL LIMITED

Address: 9QRC, 9 Queen's Road Central, Central, Hong Kong, China

Telephone: +852 4647 0122

GOLDEN DRAGON CAPITAL

3.2.1	Wet Processing.....	60
3.2.2	Dry Processing.....	61
3.3	Anode Production Methods	63
3.3.1	Li Metal Anodes	63
3.3.2	Graphite/Silicon Anodes	64
3.4	Solid-State Battery Manufacturing Process	64
3.4.1	Electrode and Electrolyte Separator Production	64
3.4.2	Cell Assembly	66
3.4.3	Cell Finishing	67
3.5	Compatibility Between Component Materials	68
4.0	Industry Development Trends	70
4.1	Short Term Development.....	70
4.2	Short Term Development Opportunities	71
4.3	Development trends Out To 3030.....	75
5.0	Cash Cost Forecast	78
6.0	Global Development and Commercialisation	80
6.1	China	82
6.2	Taiwan.....	100
6.3	Japan.....	103
6.4	South Korea.....	107
6.5	United States	109
6.6	France	120
7.0	Market Size and Potential	121
	References.....	122
	Disclaimer	128
