

China LFP Battery Recycling Research Report

Date: May, 2024

Author: Brendan Jephcott

Prepared by:

GOLDEN DRAGON CAPITAL

Table of Contents

Executive Summary	2
1.0 Introduction	9
1.1 Lithium-Ion Battery Technology	9
1.2 Structure of Phospho-Olivines	12
1.3 LFP Working Principal	13
1.4 Rise of Lithium-ion Battery Recycling	14
1.5 Need for Circular Economy.....	20
1.6 Industry Formation.....	22
2.0 Retired LFP Battery Recycling.....	24
2.1 LFP Battery Recycling Steps	24
2.1.1 Discharging and Dismantling	24
2.1.2 Separation of Cathode Material and Al Foil	25
2.1.3 Leaching and Product Separation.....	26
2.1.4 Recovery of Graphite from Anode Material.....	27
2.1.5 Recovery of Electrolyte	28
2.2 Industry Challenges.....	30
3.0 Commercialisation	32
3.1 Auto Companies	32
3.2 Gigafactory Companies	34
3.3 Battery Material Companies	35
3.4 Third-Party Recycling Companies	36
4.0 Competitive Landscape.....	37
Appendix: Retired LFP Battery Recycling Case Studies.....	38
1.1 Hunan Brunp Recycling Technology Co., Ltd.....	39
1.2 Yichang Bangpu Recycling Technology Co., Ltd.....	47
1.3 Hunan Jinkai Cycle Technology Co., Ltd.....	55
1.4 Guangdong Guanghua Sci-Tech Co., Ltd.....	65
References.....	68
Disclaimer	70

List of Figures

Figure 1: Parts of a Lithium-ion Battery	9
Figure 2: Discharging and Charging of a Lithium-ion Battery	10
Figure 3: Schematics of inner structures of commercial Lithium-ion Batteries	12
Figure 4: LFP schematic of the crystal structure	13
Figure 5: Charging and Discharging of a LiFePO ₄ Battery	14
Figure 6: Working principal of LFP cathode material.....	14
Figure 7: Full life cycle of LFP power battery	15
Figure 8: Schematic diagram of the power battery recycling industry chain.....	15
Figure 9: China power batteries installed capacity forecast (2022 to 2030E).....	16
Figure 10: Average energy density in power batteries forecast trend (2017 to 2030E).....	16
Figure 11: China power battery installed capacity forecast (2016 to 2025E)	17
Figure 12: Theoretical retired batteries market size forecast (2022E to 2030E)	18
Figure 13: Recoverable cathode market size forecast (2022E to 2030E)	18
Figure 14: Recoverable metal chemical salts market size forecast (2022E to 2030E).....	19
Figure 15: Recoverable metal value forecast (2022E to 2030E)	20
Figure 16: Theoretical and actual capacity of China lithium-ion batteries recycling companies	23
Figure 17: Recycling steps for LFP batteries	24
Figure 18: Two research recycling processing flowsheets for recovering graphite from recycled anode material	28
Figure 19: Electrolyte recovery processing flowsheet using the supercritical CO ₂ extraction method.....	29
Figure 20: Auto company recycling business model	33
Figure 21: Gigafactory — recycling company business model.....	35
Figure 22: Battery material company recycling business model	36
Figure 23: Third-party company recycling business model	36
Figure 24: Brunp Recycling, office in Hunan Province, China	39
Figure 25: Hydrometallurgy retired LFP battery recycling processing flowsheet	42
Figure 26: Pyrometallurgy retired LFP battery recycling processing flowsheet	43
Figure 27: Operation water balance diagram (unit: m ³ /a).....	45
Figure 28: Flowsheet of the production line for comprehensive utilization of retired LFP battery packs and cathode sheet scraps.....	52
Figure 29: Graphite recycling production line process flow chart	54
Figure 30: KeyKing Recycling — Recycling facility located in Leiyang City, Hunan Province, China	56
Figure 31: Battery waste (left) and lithium iron phosphate black mass (right)	56
Figure 32: LFP power battery recycling production line (left), ternary material recycling production line (center), Li ₂ CO ₃ purification production line (right)	59
Figure 33: Retired EV-Type LFP LIB recycling production line flowsheet and material balance (unit: tpa)	61
Figure 34: LFP battery recycling production line water balance analysis (unit: tpa)	62
Figure 35: GHTECH office, Guangdong Province, China	65
Figure 36: GHTECH new energy business layout.....	66
Figure 37: GHTECH patent LFP battery recycling process flowsheet.....	67

List of Tables

Table 1: Lithium-ion battery main component materials and composition	11
Table 2: Forecast market size of recyclable metal chemical salts (2022E to 2030E)	17
Table 3: Lithium-ion battery recycling market size forecast (2022E to 2030E) {1 USD ~ 7 CNY}	19
Table 4: Lithium-ion battery component materials and their potential environmental damage	21
Table 5: Contained metals within power batteries	22
Table 6: Challenges in the battery recycling industry	30
Table 7: Lithium-ion battery recycling industry business models	32
Table 8: Auto companies — recycling business models	33
Table 9: China lithium-ion LFP and ternary battery actual and planned recycling production capacity (2023).....	37
Table 10: Project raw materials and annual consumption	39
Table 11: Raw material specifications	39
Table 12: Final products.....	40
Table 13: Iron phosphate product specification (HG/T 4701-2014).....	40
Table 14: LFP product specification (GB/T33822-2017)	40
Table 15: Mass balance table	44
Table 16: Balance of elements.....	44
Table 17: Equipment and machinery.....	46
Table 18: Project production line and raw material consumption	57
Table 19: Consumption data by product raw materials and chemical raw materials	57
Table 20: Chemical composition of retired power batteries.....	58
Table 21: LFP battery recycling production line material balance sheet	61
Table 22: LFP battery recycling production line water balance	62
Table 23: List of equipment and machinery	63
