

# ANODE MATERIAL

---

## Market Research Report

**Author:** Brendan Jephcott

**Date:** January 2024

## Table of Contents

Executive Summary .....	2
1.0 Introduction.....	14
1.1 Role of the Anode Material .....	14
1.2 Anode Material Product Types .....	15
2.0 Principal Production Methods.....	18
2.1 Processing Flowsheets .....	18
2.1.1 Natural Graphite Anode Material.....	20
2.1.2 Synthetic Graphite Anode Material.....	24
2.1.3 Soft Carbon and Hard Carbon.....	27
2.2 Product Specifications.....	27
2.2.1 China National Product Standard (GBT 24533-2019) .....	27
2.3 Raw Materials.....	28
2.3.1 Natural Graphite Anode Material .....	28
2.3.2 Synthetic Graphite Anode Material.....	31
3.0 Rise of Graphitisation .....	37
3.1 Graphitisation Principal Processing Methods.....	37
3.2 Graphitisation Commercialisation .....	43
4.0 Pricing.....	47
5.0 Commercialisation.....	48
5.1 Market Demand.....	48
5.2 Market Supply.....	50
5.3 Competitive Landscape .....	52
5.3.1 BTR New Material Group Co., Ltd .....	60
5.3.2 Shanghai Putailai New Energy Technology Co., Ltd .....	64
5.3.3 Ningbo Shanshan Co., Ltd.....	69
5.3.4 Hunan Zhongke Electric Co., Ltd.....	73
5.3.5 Shenzhen XFH Technology Co., Ltd (Xiangfenghua) .....	78
5.3.6 Guangdong Kaijin New Energy Technology Co., Ltd.....	84
5.3.7 Shijiazhuang Shangtai Technology Co., Ltd.....	85
5.3.8 Overseas (South Korea, Japan, North America).....	92
References.....	95
Disclaimer .....	98

## Figures

Figure 1: Schematic diagram of a lithium-ion battery (top) and battery package formats (bottom) — (a) coin, (b) cylindrical, (c) prismatic, (d) pouch.....	14
Figure 2: Anode material used in lithium-ion batteries (illustrative).....	15
Figure 3: Types of anode material used in lithium-ion batteries.....	15
Figure 4: Lithium-ion battery anode material industry chain.....	16
Figure 5: Performance comparison of different anode materials.....	18
Figure 6: Principal processing flowsheets of graphite anode materials used by various companies.....	19
Figure 7: Natural graphite anode material processing flowsheet.....	20
Figure 8: Process flowsheet for spherical graphite production from mine site (red) to spherical plant (blue).....	21
Figure 9: Microscopic images of natural flake graphite (left) and uncoated graphite spheroids (right).....	21
Figure 10: Chinese SPG plant.....	22
Figure 11: Anode production for lithium-ion battery.....	23
Figure 12: Synthetic graphite anode material processing flowsheet.....	24
Figure 13: Graphite lattice formation with increasing heat.....	26
Figure 14: Synthetic graphite manufacturing process.....	26
Figure 15: Soft carbon structure (left) and hard carbon structure (right).....	27
Figure 16: European flake graphite prices.....	30
Figure 17: Chinese flake graphite prices.....	30
Figure 18: Chinese uncoated spherical graphite price (1USD~7CNY).....	31
Figure 19: Classification of synthetic graphite raw materials.....	31
Figure 20: Needle coke industry.....	32
Figure 21: Needle coke (illustrative).....	33
Figure 22: Petroleum coke (illustrative).....	33
Figure 23: Needle coke price CNY per tonne (1USD~7CNY).....	35
Figure 24: Average purchase price of coke from synthetic graphite anode material companies (1USD~7CNY).....	35
Figure 25: China petroleum coke prices (CNY per tonne).....	37
Figure 26: Graphitisation structural change process.....	37
Figure 27: Graphitisation furnace loading profile.....	39
Figure 28: Graphitisation furnace loading plan.....	39
Figure 29: Schematic diagram of a graphite crucible.....	39
Figure 30: Schematic diagram of the structure of Putailai's (Zichen) box furnace.....	40
Figure 31: Schematic diagram of a continuous graphitisation furnace.....	41
Figure 32: Proportion of graphitisation cost of Putailai (2021).....	44
Figure 33: Graphitisation price in China (CNY per tonne).....	45
Figure 34: Natural graphite anode material prices in China.....	47
Figure 35: Synthetic graphite anode material prices (CNY per tonne).....	47
Figure 36: Global lithium-ion battery production (2017 to 2021).....	48
Figure 37: China lithium-ion battery production by product (2017 to 2021).....	48
Figure 38: Global lithium-ion power battery shipments (2017 to 2021).....	49
Figure 39: Global new energy vehicle sales (2017 to 2021).....	49
Figure 40: China anode material production (2016 to 2022).....	50
Figure 41: China anode material production by product (2016 to 2022).....	51
Figure 42: China natural graphite anode material production 2017 to 2021.....	51
Figure 43: China synthetic graphite anode material production 2017 to 2022.....	51
Figure 44: Distribution of China anode material production 2022.....	52
Figure 45: Distribution of global anode material production capacity (2022).....	52
Figure 46: Distribution of China Anode Material Production (2023).....	53
Figure 47: Comparison of major Chinese anode material production volumes (2021).....	53
Figure 48: Revenue comparison between anode material companies.....	54
Figure 49: BTR — Natural graphite anode material products.....	62
Figure 50: BTR — Synthetic graphite anode material products.....	63
Figure 51: Putilal — synthetic graphite anode material principal processing flowsheet.....	65
Figure 52: Putailai — Anode material revenue and gross profit margin (1USD~7CNY).....	66
Figure 53: Putailai — Graphitisation processing revenue and gross profit margin (1USD~7CNY).....	66
Figure 54: Profit margins of major Chinese anode material companies.....	67
Figure 55: Putailai — Anode material net profit 2017 to 2021 (1USD~7CNY).....	67
Figure 56: Putailai — Anode material production cash cost 2017 to 2020.....	68
Figure 57: Putailai — Cost proportion of anode materials 2017 to 2020.....	68
Figure 58: Shanshan — Anode material production bases.....	69

Figure 59: Shanshan — Anode material sales volume 2016 to 2021.....	71
Figure 60: Shanshan — Net profit per tonne of material 2016 to 2021 (1USD~7CNY).....	72
Figure 61: Zhongke Electric office building in Changsha, Hunan Province, China.....	73
Figure 62: Zhongke Electric — Company revenue structure (2018 to 2022).....	74
Figure 63: Zhongke Electric — Production and sales of anode material (2019 to 2022).....	76
Figure 64: Zhongke Electric — Anode material sales revenue 2018 to 2022 (1USD~7CNY) .....	77
Figure 65: Zhongke Electric — Anode material unit sales price and gross profit margin 2018 to Q3-2021 (1USD~7CNY) 77	77
Figure 66: Shenzhen XFH Technology Co., Ltd.....	78
Figure 67: Xiangfenghua — Anode material production capacity (2016 to 2022) .....	79
Figure 68: Xiangfenghua — Natural graphite anode material unit price and unit cost 2017 to 2019 (1USD~7CNY)80	80
Figure 69: Xiangfenghua — Synthetic graphite anode material unit price and unit cost 2017 to 2019 (1USD~7CNY) 80	80
Figure 70: Xiangfenghua — Natural graphite anode material unit cost breakdown 2017 to 2019 (1USD~7CNY)....	81
Figure 71: Xiangfenghua — Synthetic graphite anode material unit cost breakdown 2017 to 2019 (1USD~7CNY) 81	81
Figure 72: Xiangfenghua — Graphitisation planned processing capacity 2018 to 2021E (1USD~7CNY) .....	82
Figure 73: Xiangfenghua — Main customers by revenue in 2020 .....	83
Figure 74: Shangtai Technology — Synthetic graphite anode manufacturing processing flowsheet.....	87
Figure 75: Shangtai Technology — Customer structure in H1-2022.....	90
Figure 76: Shangtai Technology — Production and sales volume from 2018 to 2022 .....	91
Figure 77: Shangtai Technology — Anode material sales structure.....	92
Figure 78: POSCO Future M Co., Ltd synthetic graphite anode material plant (completed in December 2021) ....	93

## Tables

Table 1: Performance comparison of different anode materials.....	17
Table 2: Graphite anode material product specifications (China National Standard GBT 24533-2019) .....	27
Table 3: Classification of Natural Graphite with its Characteristics .....	28
Table 4: Natural flake graphite size fractions.....	29
Table 5: Classification of petroleum coke and needle coke.....	34
Table 6: Anode material enterprises cooperation with upstream raw material suppliers.....	36
Table 7: Degree of increasing graphitisation as temperature increases.....	38
Table 8: Degree of increasing graphitisation under same temperature but increasing heating time .....	38
Table 9: Calculation of output of single furnace of different manufacturers under the crucible furnace process.....	40
Table 10: Process transformation of box furnace to increase production capacity .....	41
Table 11: Comparison of the advantages and disadvantages of different graphitisation furnace types.....	42
Table 12: Comparison of crucible method, box method, and continuous method .....	42
Table 13: Graphitisation process of anode material enterprises.....	43
Table 14: Cost structure of synthetic graphite .....	43
Table 15: Graphitisation expansion plans of mainstream anode material manufacturers.....	45
Table 16: Anode material cost split (end-2022) .....	46
Table 17: Estimation of graphitisation self-supply rate of some anode material companies.....	46
Table 18: Major Chinese anode material companies and their competitive landscape .....	54
Table 19: New customer development process for anode materials.....	55
Table 20: Major customers of major anode manufacturers .....	56
Table 21: Supply relationship between Chinese anode companies and global lithium-ion battery companies.....	56
Table 22: Comparison of Chinese synthetic graphite anode material product specifications .....	57
Table 23: Major Chinese anode material companies — Planned production capacity (2019 to 2023E) .....	58
Table 24: New entrants to the anode material industry .....	59
Table 25: BTR — Natural graphite anode material planned production capacity .....	60
Table 26: BTR — Synthetic graphite anode material and graphitisation planned production capacity .....	61
Table 27: Performance comparison of different graphitisation methods.....	61
Table 28: BTR — Natural graphite anode material product specifications.....	62
Table 29: BTR — Synthetic graphite anode material product specifications .....	63
Table 30: Putailai — Anode material and graphitisation planned production capacity (2018 to 2024E).....	64
Table 31: Putailai — Synthetic graphite product specifications.....	65
Table 32: Shanshan — Anode material production bases and capacity 2021.....	69
Table 33: Shanshan — Anode material and graphitisation planned production capacity (2021 to 2025E) .....	70
Table 34: Shanshan — Synthetic graphite product specifications.....	71
Table 35: Shanshan — Technological advantages lead .....	72
Table 36: Zhongke Electric — Anode material and graphitisation planned production capacity (2020 to 2024).....	75
Table 37: Xiangfenghua — Anode material product series.....	79
Table 38: Kaijin Energy — Anode material product series.....	84
Table 39: Shangtai Technology — Anode material planned production capacity (2021 to 2025E).....	85
Table 40: Comparison of graphitisation costs in the anode industry.....	85
Table 41: Shangtai Technology — Single tonne selling price and cost breakdown of anode material.....	86
Table 42: Shangtai Technology — anode products and graphitisation design production capacity.....	86
Table 43: Shangtai Technology — core technologies related to anode materials .....	87
Table 44: Average price of electricity purchased by the company (unit: CNY/kWh).....	88
Table 45: Shangtai Technology — Anode material product specifications.....	89
Table 46: Japan and South Korea anode material production capacity.....	92
