

SEPARATOR MATERIAL

Industry Research Report

Author: Brendan Jephcott

Date: October 2024

Table of Contents

Executive Summary	2
1.0 Introduction.....	7
1.1 Product Performance Characteristics	9
2.0 Principal Production Process.....	10
2.1 Dry Processing Method.....	10
2.2 Wet Processing Method	12
2.3 Comparison between the Dry and Wet Separators	14
2.4 Post-Production Coating (Product Modification)	16
2.4.1 Separator Coating Materials	17
2.4.2 Coating Modification Processing Method	20
2.5 Cash Cost Analysis.....	24
3.0 Commercialisation	30
4.0 Competitive Landscape.....	39
4.1 Chinese Lithium-ion Battery Separator Companies	42
4.2 Overseas Lithium-Ion Battery Separator Companies.....	45
4.3 Global Planned Production Capacity Expansions	49
4.4 Barriers to Entry.....	52
5.0 Market Size Potential	56
Appendix: Semcorp	57
References.....	78
Disclaimer	79

Figures

Figure 1: Working principle of a lithium-ion battery showing the separator in the centre	7
Figure 2: Separator insulating film material used in lithium-ion batteries	7
Figure 3: Lithium-ion battery separator industry chain.....	8
Figure 4: Lithium-ion battery separator working principle.....	8
Figure 5: Dry uniaxial stretching method principal process flowsheet.....	11
Figure 6: Dry uniaxial stretching (left) and biaxial stretching (right)	11
Figure 7: Wet method principal process flowsheet	13
Figure 8: Pore structure of a wet separator	13
Figure 9: Asynchronous processing method and synchronous process flowsheet.....	13
Figure 10: Coated (above) and conventional (below) thermal stability testing.....	17
Figure 11: Structural diagram of ceramic coated separator	19
Figure 12: Structure diagram of PVDF coated separator.....	19
Figure 13: Coated separator principal processing flowsheet	20
Figure 14: Schematic diagram of gravure roller coating process.....	21
Figure 15: Schematic diagram of narrow-slit extrusion coating process.....	21
Figure 16: China inorganic coated separator dosage demand forecast (2019 to 2025E)	23
Figure 17: China boehmite demand forecast (2019 to 2025E).....	23
Figure 18: Changes in separator sales and unit cost.....	26
Figure 19: Separator cash cost distribution	26
Figure 20: Price of polypropylene (PP) powder from 2020 to Oct 2022 (unit: CNY per tonne).....	27
Figure 21: Price of polyethylene (PE) powder from 2020 to Oct 2022 (unit: CNY per tonne).....	27
Figure 22: Distribution cash cost of a coated separator	28
Figure 23: Prices of battery-grade PVDF from 2020 to October 2022 (unit: x10,000 CNY per tonne).....	28
Figure 24: Changes in separator production costs for Semcorp (CNY/sqm).....	29
Figure 25: New energy vehicles sales in Europe (2018 to 2025E).....	31
Figure 26: New energy vehicles sales in the United States (2018 to 2025E).....	31
Figure 27: New energy vehicles sales in China (2018 to 2023E)	32
Figure 28: Global lithium-ion power battery shipments forecast from 2016 to 2025 (GWh).....	33
Figure 29: Global lithium-ion battery energy storage shipments forecast from 2016 to 2025 (GWh)	33
Figure 30: China dry and wet separator shipments (2014 to 2022) (unit: x100 million square meters).....	35
Figure 31: China monthly production of battery separators (unit: 100 million square meters).....	35
Figure 32: China wet and dry separator shipments market share (2014 to 2022)	36
Figure 33: China wet and dry battery separator market share (2022)	36
Figure 34: Separator material market prices from January 2020 to March 2023 (unit: CNY/sqm).....	37
Figure 35: Prices of mainstream separator products (July 2022 to December 2022)	38
Figure 36: Prices of major coated separators (July 2022 to December 2022)	38
Figure 37: China wet separator competitive landscape (2022).....	40
Figure 38: China dry separator competitive landscape (2022).....	40
Figure 39: China separator competitive landscape (2022)	41
Figure 40: Global separator competitive landscape (2022)	41
Figure 41: China Battery Separator Planned Production Capacity (2021E to 2024E).....	51
Figure 42: Lithium-ion Battery Component Material Fixed Asset Share	53
Figure 43: Semcorp — Separator product.....	60
Figure 44: Semcorp — Customer structure (2022)	62
Figure 45: Semcorp — Changes in the total sales amount of the company's top five customers	63
Figure 46: Semcorp — Overseas revenue (billion CNY, %).....	65
Figure 47: Semcorp — Overseas gross profit (billion CNY, %).....	65
Figure 48: Semcorp — Patents (2018 to 2021)	66
Figure 49: Comparison of yield rates of separator companies	67

GOLDEN DRAGON CAPITAL

Figure 50: Direct material cost as a percentage of revenue	67
Figure 51: Semcorp — Blow molding film forming process production line	68
Figure 52: Semcorp — PMMA separator SEM image.....	69
Figure 53: Semcorp — Schematic diagram of high-porosity structure	69
Figure 54: Semcorp — High-safety aramid coated film.....	70
Figure 55: Comparison of solid-state batteries and traditional liquid batteries	71
Figure 56: Semcorp — Dry separator joint venture	72
Figure 57: China lithium-ion battery segmentation type share structure (2017 to 2021)	73
Figure 58: China power soft-pack battery installed capacity and growth rate.....	73
Figure 59: Semcorp — Operating income 2018 to 2024-Q1 (billion CNY, %).....	75
Figure 60: Semcorp — Net profit attributable to shareholders from 2018 to Q1-2024 (billion CNY, %)	76
Figure 61: Semcorp — Gross profit margin (%) in 2018-2024Q1.....	76
Figure 62: Gross profit margins of comparable companies.....	77
Figure 63: Semcorp — Expense ratios (2018 to 2024-Q1).....	77

Tables

Table 1: Performance requirements of separators used in lithium-ion batteries.....	9
Table 2: Uniaxial stretching process flowsheet.....	11
Table 3: Wet biaxial asynchronous stretching process flowsheet	12
Table 4: Comparison of the dry and wet production processes	15
Table 5: Performance comparison of dry and wet separators	16
Table 6: Comparison of the main coating materials used for battery separators	18
Table 7: Comparison of different separator coating materials	18
Table 8: Comparison of different inorganic coating materials (alumina and boehmite).....	18
Table 9: Comparison of different organic coating materials (PVDF vs. Aramid fiber).....	19
Table 10: Comparison of ceramic coated separators and PVDF coated separators.....	20
Table 11: Coating patents of related separator companies.....	22
Table 12: Coating modification processing method comparison.....	22
Table 13: Wet separator cost structure under different widths and vehicle speeds (CNY/sqm).....	24
Table 14: Calculation of costs for orders under different capacity utilisation rates (CNY/sqm)	24
Table 15: Production cash cost, expenses and profit (2021).....	25
Table 16: Changes in purchase prices of separator raw materials	25
Table 17: China separator company — Planned production capacity expansions (2021)	49
Table 18: New entrants planned production capacity.....	50
Table 19: Global separator planned production capacity (2021E to 2024E).....	51
Table 20: global separator equipment supplies and relationships with Chinese manufacturers	52
Table 21: Chinese separator equipment companies (not exhaustive).....	53
Table 22: Investment in related projects of the four main battery component material enterprises.....	54
Table 23: Separator supply and demand estimation table (2022-2024)	56
Table 24: Semcorp — Product portfolio.....	59
Table 25: Semcorp — Planned production capacity (2019 to 2025E)	61
Table 26: Semcorp — Large-scale orders since 2021	64
Table 27: Semcorp — Dry process separator project.....	72
Table 28: Semcorp — Aluminum-plastic film project progress status.....	74
