

CHINA SILICON-BASED ANODE MATERIAL

Market Research Report

Author: Brendan Jephcott

Date: March 2025

Table of Contents

Executive Summary	2
1.0 Introduction	9
1.1 Rise of Silicon-Based Composite Anode Material	9
1.2 Electrode Manufacturing	12
2.0 Silicon-Based Anode Material.....	15
2.1 Characteristics of Silicon as an Anode Material	15
2.2 Characteristics of SiOx as an Anode Material	16
2.3 Silicon-Based Anode Material Challenges.....	17
2.4 Silicon-Based Anode Material Products	18
3.0 Silicon-Based Anode Material Structure Design	20
3.1 Nanosized Si Structure.....	20
3.2 Porous Structure	24
3.3 Core-shell Structure.....	25
3.4 Yolk-shell Structure	27
3.5 Embedded Structure	29
4.0 Silicon-Based Anode Material Production Methods	29
4.1 Si/C Anode Material Grinding Production Method	31
4.2 SiOx Anode Material Grinding Production Method	33
4.3 SiOx Anode Material Pre-magnesium & Pre-lithium Production Method	35
4.4 Silicon-Carbon Anode Material CVD Production Method	38
4.5 Silicon Anode Upstream Raw Materials.....	46
4.5.1 Silicon	46
4.5.2 Silane Gas.....	48
4.5.3 Porous Carbon	50
5.0 Chinese Silicon-Based Anode Material Standards	52
5.1 GB/T 38823-2020 Silicon-carbon	52
5.2 YB/T 6260-2024 Silicon monoxide carbon composite.....	53
6.0 Pricing	55
7.0 Commercialisation.....	56
7.1 Consumer Electronics	56
7.2 Small Power Battery Application.....	57
7.3 New Energy Vehicles	58
7.4 4680 LIB Cell to Promote Development of Silicon-Based Anode Material.....	59
7.5 Fast-Charging to Promote Development of Silicon-Based Anode Material	61
7.6 Solid State Battery Products	63
7.7 Market Size Potential.....	63
8.0 Silicon-Based Anode Material Enterprises.....	64
References.....	72
Disclaimer	75

Figures

Figure 1: Parts of a lithium-ion battery.....	9
Figure 2: Main types of anode material (carbon and non-carbon).....	10
Figure 3: Characteristic and performance of silicon-based anode material.....	11
Figure 4: Flowchart illustrating the electrode fabrication process.....	12
Figure 5: Electrode fabrication process by the wet method.....	13
Figure 6: Electrode dry processing methods under development.....	14
Figure 7: Electrode fabrication process by the dry method.....	14
Figure 8: Lithium extraction/insertion curves of Si at room temperature and 450°C.....	15
Figure 9: Crystalline Li-Si structures.....	16
Figure 10: Diagram showing the challenges of silicon anode materials.....	18
Figure 11: Performance of silicon-based anode material with different particle sizes.....	20
Figure 12: Performance of silicon-carbon based anode material with different particle sizes.....	21
Figure 13: Conventional nanosilicon principal processing flowsheet.....	22
Figure 14: Ball milling process.....	23
Figure 15: Porous structured silicon-carbon composite.....	24
Figure 16: Preparation process of porous silicon-carbon composite.....	24
Figure 17: Silicon carbon coating structure (illustrative).....	25
Figure 18: Core-shell structure design and preparation methods.....	26
Figure 19: Core-shell double-layered cladding structure.....	27
Figure 20: Yolk-shell structure design and preparation methods.....	28
Figure 21: Embedded structure preparation methods.....	29
Figure 22: BTR Si/C anode material principal processing flowsheet.....	31
Figure 23: Conventional SiOx principal processing flowsheet.....	33
Figure 24: BTR New Material Group Co., Ltd SiOx anode material principal processing flowsheet.....	33
Figure 25: Shanghai Putailai New Energy Technology Co., Ltd SiOx anode material processing flowsheet.....	34
Figure 26: Pre-magnesium improves first effect of silica.....	35
Figure 27: Pre-lithiation anode material methods.....	35
Figure 28: Charge/discharge profiles of SiO ₂ electrodes (2nm, 10nm & 300nm), before (a, c, e) and after (b, d, f) lithiation.....	37
Figure 29: Guoxuan High-tech production flowsheet of pre-lithiated silicon-based anode material.....	37
Figure 30: Schematic of the chemical vapor deposition process.....	38
Figure 31: Silicon Carbon Anode Material Cost Structure (as of end-2024).....	45
Figure 32: Abundance of various materials in the Earth's crust.....	46
